

Dear antiX user,

If you see this text, antiX was not completely translated to your language by now. Maybe there wasn't anything translated at all. Since antiX is free software, there is no enterprise responsible to create all the desired translations. It is up to the community of antiX users to step in and translate missing parts ourselves. You can help to make antiX available to people of your country or native tongue, simply by joining the antiX volunteer translation team, helping to provide some new translated parts and strings. There is no obligation you incur by joining the team, and you can do as much or as little as you like. You could also encourage other users you accidentally know to join. The more people start translating, the faster your language will be available. For all questions and suggestions please visit

<https://www.forum.antixlinux.com>

You can join the antiX translation team directly at transifex:

Sign up for free:
